# Safety Instructions

For your safety, the information in this manual must be followed to minimize the risk of fire or explosion, electric shock, or to prevent property damage, personal injury or loss of life. Explanation of the symbols:

# ⚠ Warning!

This combination of symbol and signal word indicates a potentially dangerous situation which may result in death or serious injuries unless it's avoided.

# O Caution!

This combination of symbol and signal word indicates a potentially dangerous situation which may result in slight or minor injuries or damage to property and the environment.

# Note!

This combination of symbol and signal word indicates a potentially dangerous situation which may result in slight or minor injuries.

# ⚠ Warning!

#### The electric shock!

- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- The new hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.
- Before any maintenance the device, unplug the appliance from the mains.

- Always unplug the machine and turn off the water supply after use. The max. inlet water pressure, in pascals. The min. inlet water pressure, in pascals.
- To ensure your safety, power plug must be inserted into an earthed three-pole socket. Check carefully and make sure that your socket is properly and reliably earthed.
- Make sure that the water and electrical devices must be connected by a qualified technician in accordance with the manufacturer's instructions and local safety regulations.
- Pull out its plug from the power socket before cleaning or maintenance.
- Do not use any socket with rated current less than that of appliance. Never pull out power plug with wet hand.
- Please remember to disconnect water and power supply immediately after the clothes are washed.

#### Risk to children!

- EN countries: the appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Children of less than 3 years should be supervised to ensure that they do not play with appliance.
- Animals and children may climb into the machine. Check the machine before every operation.
- Kids should be supervised that they do not play with the appliance.

- Glass door may be very hot during the operation. Keep kids and pets far away from the machine during the operation very wet rooms as well as in the rooms with explosive or caustic gas.
- Remove all packages and transport bolts before using the appliance. Otherwise, serious damage may result.

#### Risk of explosion!

- Do not wash or dry articles that have been cleaned in, washed in, soaked in, or dabbed with combustible or explosive substances (such as wax, oil, paint, gasoline, degreasers, dry-cleaning solvents, kerosene, etc.) This may result in fire or explosion.
- The washer dryer is not to be used if industrial chemicals have been used for cleaning.
- The exhaust air must not be discharged into a flue which is for exhausting fumes from appliances burning gas or other fuels.
- · Before hand thoroughly rinse items of washing by hand.

# O Caution!

#### Installing the product!

- This appliance is for indoor use only.
- It isn't intended to be built-in using.
- The openings must not be obstructed by a carpet.
- The appliance shall not be installed in bath room or very wet rooms as well as in the rooms with explosive or caustic gases.
- The appliance with single inlet valve only can be connected to the cold water supply. The appliance with double inlet valves should be correctly connected to the

hot water and cold water supply.

- Plug must be accessible after installation.
- The appliance must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the washer dryer.
- The appliance shall not be installed at a humid place.
- Remove all packages and transport bolts before using the appliance. Otherwise, serious damage may result.

# Risk of damaging appliance!

- The product is only for home use and is only designed for the textiles suitable for machine washing and drying.
- Do not climb up and sit on top cover of the machine.
- Do not lean against machine door.
- Cautions during Handling Machine:
  - Transport bolts shall be reinstalled to the machine by a specialized person.
  - 2. The accumulated water shall be drained out of the machine.
  - 3. Handle the machine carefully. Never hold each protruded part on the machine while lifting. Machine door can not be used as the handle during the conveyance.
  - 4. This appliance is heavy. Transport with care.
  - 5. That the hands shall not be inserted into running water extracting tub.
- Please do not close the door with excessive forces. If it is found difficult to close the door, please check if the clothes are put in or distributed well.
- It is forbidden to wash carpets.

Operating the appliance!

- Before washing the clothes at first time, the product shall be operated in one round of the whole procedures without the clothes inside.
- Flammable and explosive or toxic solvents are forbidden.
   Gasoline and alcohol etc.Shall not be used as detergents.
   Please only select the detergents suitable for machine washing, especially for drum.
- Make sure that all pockets are emptied. Sharp and rigid items such as coin, brooch, nail, screw or stone etc. may cause serious damages to this machine.
- Please check whether the water inside the drum has been drained before opening its door. Please do not open he door if there is any water visible.
- Be careful of burning when the product drains hot washing water.
- After the program is completed, Please wait for two minutes to open the door(Some model).
- Never refill the water by hand during washing.
- If it is unavoidable that fabrics that contain vegetable or cooking oil or have been contaminated by hair care products. it be placed in a tumble dryer they should first be washed in hot water with extra detergent, this will reduce, but not eliminate, the hazard.
- Adequate ventilation has to be provided to avoid the back flow of gases into the room from appliances burning other fuels, including open fires.
- Do not dry unwashed items in the appliance.
- Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot with an extra amount of detergent before being dried in the appliance.

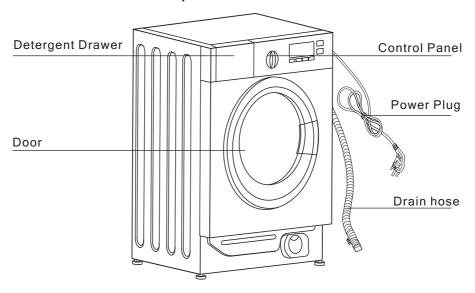

- Items such as foam rubber (latex foam), shower caps, water proof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the machine.
- Fabric softeners, or similar products, should be used as specified by the fabric softener instructions.
- The machine whose lid can be opended during water extraction, that it takes 15s or more for complete stop of water extracting chamber tub.
- The final part of a washer dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Remove all objects from pockets such as lighters and matches before use the appliance.
- WARNING: Never stop a washer dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.

# Packaging/Old appliance

This marking indicates that this product should not be disposed with other household wastes throughout the EU.To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the collection systems or contact the retailer where the product was purchased. They return and can take this product for environmental safe recycling.

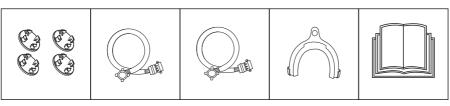

# Product Description

Supply hose hot water (optional)

Drain hose supportOwner's manual (optional)

#### Installation

#### Installation area

# ⚠ Warning!

- Stability is important to prevent the product from wandering!
- Make sure that the product should not stand on the power cord.

Before installing the machine, the location characterized as follows shall be selected:

- 1. Rigid, dry, and level surface
- 2. Avoid direct sunlight
- 3. Sufficient ventilation
- 4.Room temperature is above 0°C
- 5. Keep far away from the heat resources such as coal or gas.

# Unpacking the washing machine

# ⚠ Warning!

- Packaging material (e.g. Films, Styrofoam) can be dangerous for children.
- There is a risk of suffocation! Keep all packaging well away from children.

- 1. Remove the cardboard box and styrofoam packing.
- 2. Lift the washer dryer and remove the base packing. Make sure the small triangle foam is removed with the bottom one together. If not, lay the unit down with side surface, then remove the small foam from the unit bottom manually.
- 3. Remove the tape securing the power supply cord and drain hose.
- 4. Remove the inlet hose from the drum.

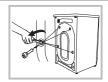

# Remove transport bolts

# ⚠ Warning!

- $\bullet$   $\;$  You must  $\;$  remove the transport bolts from the backside before using the product.
- You'll need the transport bolts again if you move the product, so make sure
  you keep them in a safe place.

Please take the following steps to remove the bolts:

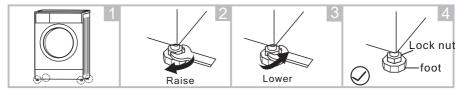

- 1.Loosen 4 bolts with spanner and then remove them.
- 2.Stop the holes with transport hole plugs.
- 3. Keep the transport bolts properly for future use.

# Levelling the washer dryer

# ⚠ Warning!

- The lock nuts on all four feet must be screwed tightly against the housing.
- 1. Check if the legs are closely attached to the cabinet. If not, please turn them to their original positions tighten the nuts.
- 2.Loosen the lock nut turn the feet until it closely contacts with the floor.
- 3. Adjust the legs and lock them with a spanner, make sure the machine is steady.

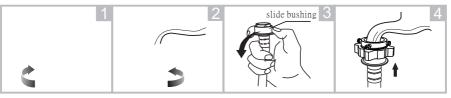

# **Connect Water Supply Hose**

# ⚠ Warning!

- To prevent leakage or water damage, follow the instructions in this chapter!
- Do not kink, crush, modify or sever water inlet hose.
- For the model equips hot valve, connect it to hot water tap with hot water supply hose. Energy consumption will decrease automatically for some program.

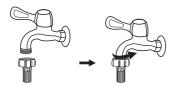

Connect the inlet pipe as indicated, There are two ways to connect the inlet pipe. 1. Connection between ordinary tap and inlet hose.

Loosen clamp nut and Tighten clamp nut four bolts

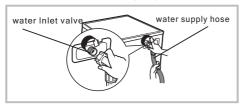

Press slide bushing, insert inlet hose into connecting base

Connection finished

# **INSTALLATION**

Connect the other end of inlet pipe to the inlet valve at the backside of product and fasten the pipe tightly clockwise.

#### **Drain Hose**

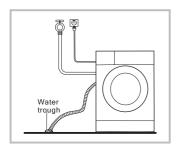

# ⚠ Warning!

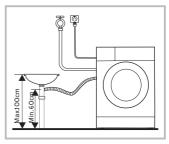

- Do not kink or protract the drain hose.
- Position drain hose properly ,otherwise damage might result of water leakage.

There are two ways to place the end of drain hose:

1.Put it into the water trough.

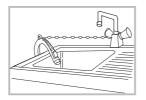

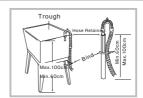

# Note!

• If the machine has drain hose support, please install it like the following

# ⚠ Warning!

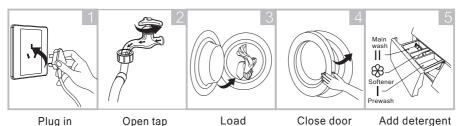

- When installing drain hose, fix it properly with a rope.
- If drain hose is too long, do not force it into washing machine as it will cause abnormal noises.

#### Quick Start

# O Caution!

- Before washing, please make sure it's installed properly.
- Before washing at first time, the washing machine shall be operated in one round of the whole procedures without clothes in as follows.

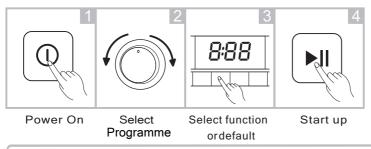

## 1. Before Washing

Note!

 Detergent need to be added in "case I "after selecting pre-washing for machines with this function.

#### 2. Washing

# Note!

1.If default is selected, step 3 can be skipped.
 2.The function button line chart is for reference only, please refer to real product as standard.

## 3. After Washing

Buzzer beep or "End" on display.

# Before Each Washing

- The working condition of the washer should be(0-40)°C.If used under 0°C, the
  inlet valve and draining system may be damaged. If the machine is placed under
  condition of 0°Cor less, then it should be transferred to normal ambient
  temperature to ensure the water supply hose and drain hose are not frozen
  before use.
- Please check the labels and the explanation of using detergent before wash. Use non-foaming or less-foaming detergent suitable for machine washing properly.

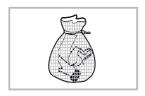

Check the label

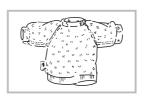

Take out the items out of the pockets

Knot the long strips, zip or button

Put small clothes into the pillow slip

Turn easy-pilling and long-pile fabric inside out

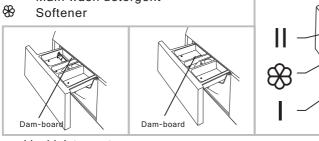

Separate clothes with different textures

# ⚠ Warning!

- When washing a single clothes, it may easily cause great eccentricity and give alarm due to great unbalance. Therefore it is suggested to add one or two more clothes to be washed together so that draining can be done smoothly.
  - Don't washing the clothes touching with kerosene, gasoline, alcohol and other flammable materials.

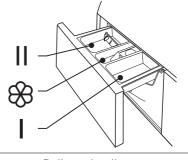

# **Detergent Dispenser**

- Pre wash detergent
- Ш Main wash detergent

Powder detergent

Pull out the dispenser

Detergent only need to be added in "case I "after selecting pre-washing for machines with this function.

# **OPERATIONS**

# Note!

- As for the agglomerated or ropy detergent or additive, before they are
  poured into the detergent box, it is suggested to use some water for
  dilution to prevent the inlet of detergent box from being blocked and
  overflowing while filling water.
- Please choose suitable type of detergent for the various washing temperature to get the best washing performance with less water and energy consumption.

#### Control Panel

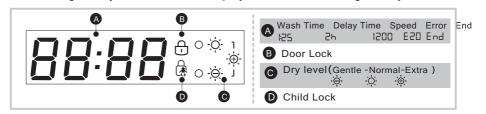

#### Model:UBG80WD

- Note!
- The chart is for reference only, Please refer to real product as standard.
- On/Off

  Product is switched on or off.
- Start/Pause Press the button to start or pause the washing cycle.
- Option This allows you to select an additional function and will light when selected.
  - 4 Programmes
    Available according to the laundry type.
- 5 Display

  The display shows the settings, estimated time remaining, options, and status messages for your washer. The display will remain on through the cycle.

## **OPERATIONS**

# Option

Delay

Delay

Set the Delay function:

- 1. Select a programme
- 2. Press the Delay button to choose the time (the delaying time is 0-24 H.)
- 3.Press [Start/Pause] to commence the delay operation

① <b>&gt;</b>	<b>&gt;</b>	Delay	>	►II
On/Off	Choose the Programme	Setting time		Start

Cancel the Delay function:

Press the [Delay] button until the display be OH.It should be pressed before starting the programme. If the programme already started, should press the [On/Off] button to reset the programme.

# ① Caution!

• If there is any break in the power supply while the machine is operating, a special memory stores the selected programme and when the power is restarted, press the [On/Off]button the program will continues.

To act the buzzer function, press the button again for 3 seconds. The setting will be kept until the next reset.

· After Muting the buzzer function, the sounds will not be activated any more.

Dry Level

Press the Dry Level button continuously to choose the dry level: Extra Dry Normal Dry Gentle/Dry

- -☆ Extra Dry:Need to wear clothes immediately ,we can choose this function
- -\(\overline{\pi}\)- Normal Dry: The normal dry procedure
- Gentle Dry:Only to dry slightly and then is just ok .

- Drying hints
  - Clothes could be dried after spinning
  - To ensure quality dry the textiles, please classify them according to their kinds and the drying temperature.
  - Synthetic should be set the proper drying time .
  - If you want to iron the clothes after drying, please put them for a while.
- Clothes not suitable for drying
  - Particularly delicate items such as synthetic curtains, woolen and silk, clothes with metal inserts, nylon stockings, bulky clothes, such as anoraks, bedcovers, quilts, sleeping bags and duvets must not be dried.
  - Clothes padded with foam-rubber or materials similar to foam-rubber must not be machine dried.
  - Fabrics containing residues of setting lotions or hair sprays, nail solvents or similar solutions must not be machine dried in order to avoid the formation of harmful vapours.

# **OPERATIONS**

# Programmes

Programmes are available according to thelaundry type.

Programmes	
Cotton	Hard-wearing textiles, heat-resistant textiles made of cotton or linen.
Cotton Eco	To increase the washing effects, washing time is increased.
Synthetic	Wash synthetic articles, for example: shirts, coats, blending. While
	washing the knitting textiles, detergent quantity shall be reduced
	due to its loose string construction and easily forming bubbles.
Baby Care	Washing the baby's clothes, it can make the baby's wear cleaner.
	and make the rinse performance better to protect the baby skin.
Jeans	Specially for jeans.
Mix	Mixed load consisting of textiles made of cotton and synthetics.
Colors	Washing brightly colored clothes, it can protect the colors better.
Sport Wear	Washing the activewear.
Quick	Extra short programme approx, suitable for lightly soiled washing as
	a small amounts of laundry.
Delicate	For delicate, washable textiles, e.g. made of silk, satin, synthetic
	fibres or blended fabrics.
Wool	Hand or machine-washable wool or richwool textiles. Especially
	gentle wash programme to prevent shrinkage, longer programme
	pauses (textiles rest in wash liquor).
Spin Only	Extra spin with selectable spin speed.
Rinse&Spin	Extra rinse with spin.
Dry Only	Select it to dry clothes, the temperature is different .The drying time
	according to the load .
1Hour W/D	For small synthetic clothes or shirts, load limitation is 1 kg (about 4
	shirts). When you have an urgent appointment but no more clean shir
	left in your cupboard, this program will help you. Time duration is only
	1 hour including wash and dry. Remark: Big towels or jeans is not
	suitable for this program, they will enlarge the time duration and

• Reference to your product to select the programmes.

# Washing Programmes Table

<b></b> ★Synthetic	8.0/4.0	40	2:20
<b> ∲</b> Cotton	8.0/6.0	40	2:40
₩1 Hour W/D	1.0/1.0	Cold	1:00

- The energy class is A Energy test program: Cotton Eco 60°C Speed: the highest speed; Other as the default.
   Half load for 8.0Kg machine: 4.0Kg.
- "Cotton Eco 60°C" is the standard washing program and "Dry only "is the standard
  drying programs to which the information in the label and the fiche relates, and they are
  suitable to clean normally soiled cotton laundry and that they are the most efficient
  programmes in terms of combined energy and water consumptions for washing that type
  of cotton laundry, that the actual water temperature may differ from the declared cycle
  temperature.

# Note!

- The parameters in this table are only for user's reference. The actual parameters maybe different with the parameters in above mentioned table.
- The programme with \* can be chosen dry function.

# Cleaning And Care

# ⚠ Warning!

• Before your maintenance starts, please unplug the machine and close the tap.

# Cleaning The Cabinet

Proper maintenance on the washing machine can extend its working life. The surface can be cleaned with diluted non-abrasive neutral detergents when necessary. If there is any water overflow, use the wet cloth to wipe it off immediately. No sharp items are allowed.

 Formic acid and its diluted solvents or equivalent are forbidden, such as alcohol, solvents or chemical products, etc.

# Cleaning The Drum

The rusts left inside the drum by the metal articles shall be removed immediately with chlorine-free detergents.

Never use steel wool.

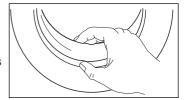

• Don't put laundry in the washing machine during the drum cleaning.

# Cleaning The Door Seal And Glass

Wipe the glass and seal after each wash to remove lint and stains. If lint builds up it can cause leaks.

Remove any coins, buttons and other objects from the seal after each wash.

# Cleaning The Inlet Filter

Inlet filter must be cleaned if there is less water.

Washing the filter in the tap

- 1.Close the tap.
- 2. Remove the water supply hose from the tap.
- 3.Clean the filter.
- 4. Reconnect the water supply hose. Washing the filter in washer dryer:
- 1.Screw off the inlet pipe from the backside of the machine
- 2.Pull out the filter with long nose pliers and reinstall it back after being washed.
- 3.Use the brush to clean the filter.
- 4.Reconnect the inlet pipe.

#### Note!

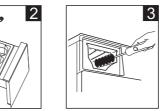

- If the brush is not clean, you can pull out the filter washed separately;
- · Reconnect, turn on the tap.

# Clean Detergent Dispenser

- 1. Press down the arrow location on softener cover inside the dispenser drawer.
- 2.Lift the clip up and take out softener cover and wash all grooves with water.
- 3. Restore the softener cover and push the drawer into position.

Pull out the dispenser Clean the dispenser drawer with press the A drawer under water

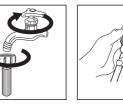

with an old toothbrush

Clean inside the recess Insert the dispenser drawer

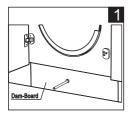

• Do not use alcohol, solvents or chemical products to clean the machine.

# **MAINTENANCES**

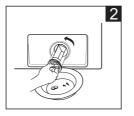

# Cleaning Drain Pump Filter

# ⚠ Warning!

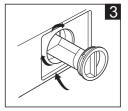

- · Be careful of the hot water!
- · Allow detergent solution to cool down.
- · Unplug the machine to avoid electrical shock before washing.
- Drain pump filter can filter the yarns and small foreign matters from the washing.
- Clean the filter periodically to ensure the normal operation of washing machine.

After the power is disconnected, pull out the

Turn the filter down as shown with the figure and take out sundries matters.

Reinstall each part back after sundries matters are removed.

# O Caution!

Dam-Board.

- Make sure that valve cap and emergency drain hose are reinstalled properly, cap plates should be inserted aligning to hole plates otherwise water may leak;
- Some machines don't have emergency drain hose, so step 2 and step 3 can be skipped.
   Rotate lower cover cap directly to make water run into basin.
- When the appliance is in use and depending on the programme selected there can be hot water in the pump. Never remove the pump cover during a wash cycle, always wait until the appliance has finished the cycle, and is empty. When replacing the cover, ensure it is securely re-tightened.

# ■ Trouble Shooting

The start of the appliance does not work or it stops during operation. First try to find a solution to the problem, If not, contact the service centre.

Description	Reason	Solution
Washer dryer cannot start up	Door is not closed properly	Restart after the door is closed Check if the clothes is stuck
Door can't be opened	Washer's safety protection design is working	Disconnect the power, restart the product
Water leakage	The connection between inle	t Check and fasten water pipes
Detergent residue in the box	<sub>S</sub> Detergent is dampened or agglomerated	Clean and wipe the detergent box
Indicator or displa	yDisconnect the power PC board or harness has connection problem	Check if the power is shut down and the power plug is connected correctly
Abnormal noise		Check if the fixing (bolts) have been removed Check it's installed on a solid and level floor

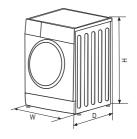

Description	Reason	Solution
E30	Door is not closed properly	Restart after the door is closed Check if the clothes is stuck
E10	Water injecting problem while washing	Check if the water pressure is too low Straighten the water pipe Check if the inlet valve filter is blocked
E21	Overtime water draining	Check if the drain hose is blocked
E12	Water overflow	Restart the washer
EXX	Others	Please try again first, call up service line if there are still troubles
¶ > 7		

• After the check, activate the appliance. If the problem occurs or the display shows other alarm codes again, contact the service.

Programme duration of Dry at full load(Drying)  340min  Power consumption of off - mode  0.5W	Water consumption of the Dry at full load(Drying)	88L/cycle
Power consumption of off - mode 0.5W	Remaining moisture content of the Dry at full load(Drying)	0%
	Programme duration of Dry at full load(Drying)	340min
Power consumption of Left on -mode 1.0W	Power consumption of off - mode	0.5W
	Power consumption of Left on -mode	1.0W
Noise level of washing 54dB (A)	Noise level of washing	54dB (A)
Noise level of spinning 78dB (A)	Noise level of spinning	78dB (A)
Noise level of drying 62dB (A)	Noise level of drying	62dB (A)

## **MAINTENANCES**

# Note!

- Programme setting for testing in accordance with applicable standard EN 50229:2015+Commission Directive 96/60/EC.
- When using the test programmes, wash the specified load using the maximum spin speed.
- The actual parameters will depend on how the applicance is used, and maybe different with the parameters in above mentioned table.
- The testing with Standard Programme(drying), the load is composed of two parts to test alone, the energy consumption, water consumption and programme duration are the total of the two parts.
- The household washer dryer machine is equipped with a power manager system. The duration of the left-on mode time is less than 1 minutes.

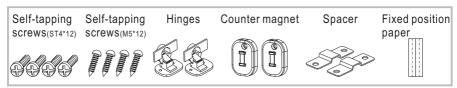

#### Remarks:

- 1 The energy efficiency class is from A(highest efficiency) to D (lowest efficiency).
- Estimated annual energy and water consumption for a four-person household, always using the dryer (based on 200 cycles) per year.
- 3 Estimated annual energy and water consumption for a four-person household, never using the dryer (based on 200 cycles)per year;
  Water consumption per year based on 220 standard washing cycles for standard programme at 60°C and 40°C at full and partial load. Actual water consumption will depend on how the appliance is used.
- Washing performance class.
- Spin-drying efficiency class from G (least efficient) to A (most efficient).
- The standard programme is standard washing programme. The programme is suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumptions for washing that type of cotton laundry. The actual water temperature may differ from the declared cycle emperature.

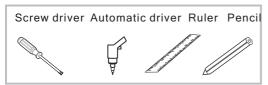

Please choose the suitable type of detergent for the various washing temperatures to get the best washing performance with less water and energy consumption.

#### ■ Built-in installation

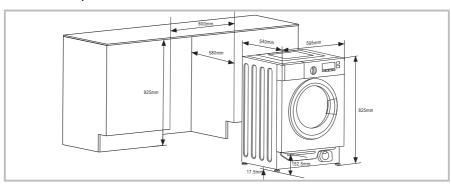

#### **Appendix**

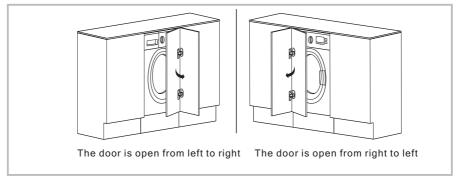

#### Tool

#### Install Steps

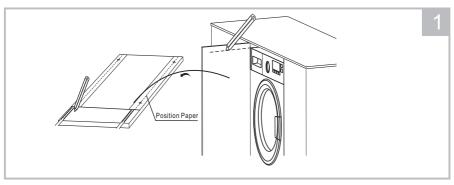

#### Overview

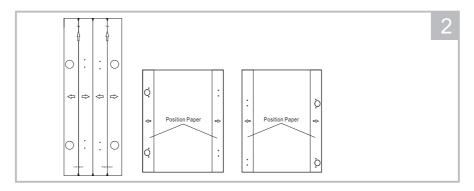

Preparation and assembly of the door

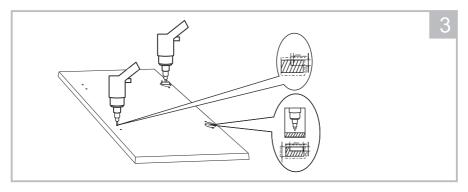

# **BUILT-IN INSTALLATION**

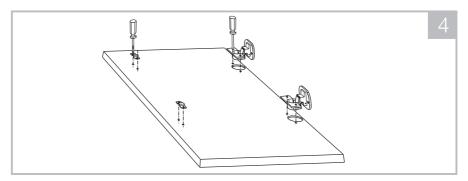

Make the mark on the door

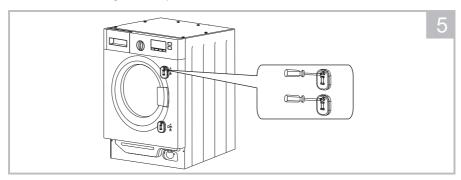

Fixed position paper on the door.

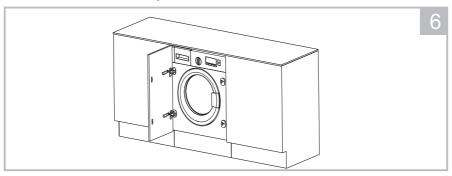

Drill hole on the door

#### Installation the hinges and spacer

#### Installation the counter magnet

#### Installation the door

# ⚠ Warning!

• When installing the appliance into the kitchen ensure furniture ,if possible, the hoses are placed in either of the two recesses on the back of the appliance. This will help to prevent the hoses from becoming kinked or trapped.
